Cloud Solution Engineer and Data Scientist

EDUCATION

University of Padua, M.Sc.

Data Science, GPA: 25.6/30

Padova, Italy

Sep. 2023 – July 2025

ITMO University, B.Sc.

Information Security, GPA: 4.6/5.0

St. Petersburg, Russia

Sep. 2018 – July 2023

University of Seoul, Exchange

Global Korea Scholarship winner; Computer Engineering & Korean Culture

Seoul, South Korea

Feb. 2021 – Jun. 2021

Whatcom Community College, Exchange

YEAR Scholarship winner; Arts and Humanities, GPA: 4.0/4.0

Bellingham, USA

Sep. 2019 – Jun. 2020

EXPERIENCE

Data & AI Consultant

Nov. 2025 – Present

Mind the Facts (Customer: Securex)

Belgium

- Designed and deployed a unified **AI ecosystem architecture** based on **Fabric and Foundry**.
- Performed data engineering and data science for production-oriented upsell use cases.
- Architected end-to-end **RAG** pipelines using Azure Data & AI stack, Microsoft Graph API, and custom Python scripting; adopted by **2,000+** users
- Translated vague business requirements into tangible technical blueprints

Data Scientist Researcher - Data Lab

Sep. 2025 – Mar. 2026

Vrije Universiteit Brussel (VUB)

Brussels, Belgium

- Contributed to a research project on **Explanation Guided Learning for Causal Effect Estimation**.
- Presented research outcomes as the main speaker at the **ORBEL Conference** in Leuven.

Technology Specialist - Data and AI

Feb. 2025 – Jul. 2025

Microsoft

Brussels, Belgium

- Built an internal tool for Microsoft leveraging our **Cloud and AI** platforms, ultimately saving time to post-sales
- Created reusable and scalable code assets for the company now being used across pre-sales and post-sales.
- Led technical demos and enterprise workshops on **Azure Cloud** and AI services across private and public sectors
- Accompanied customers and various stakeholders from POC to deployment on key transformative projects
- Developed and delivered custom POCs using Azure Foundry and Azure Machine Learning for enterprise customers
- Conducted architecture assessments and cost estimations for cloud-based Azure solutions.

Solution Architect & Product Manager

Feb. 2023 – June 2024

Replika, Luka Inc.

San Francisco, USA (Remote)

- Managed a cross-functional team** of multimedia **GenAI** specialists, provided expertise on Stable Diffusion.
- Collaborated with **AI/ML** researchers to enhance image generation, improving efficiency by 30%.
- Optimized dialogue experience with conversational AI, boosting user retention by 15% through enhanced safety features.
- Trained teams on generative AI, driving a 25% increase in performance optimization.

Solution Engineer

Nov. 2021 – Nov. 2022

Semrush

Boston, USA (Remote)

- Delivered product demos and onboarding to enterprise sales reps and clients, accelerating ramp-up on technical features.
- Ran client webinars and training sessions, and synthesized product feedback into insights that shaped development priorities.

SKILLS

Product: Sales, Project Management, Marketing, Stakeholder Management

Artificial Intelligence: **Machine Learning** (MLOps, Azure ML, ...), **Generative AI** (MCP, GenAIOps, A2A, Azure AI Foundry, ...)

Tech stack: Power BI, GitHub, Python, SQL, DevOps, Cloud, **Azure**, Fabric, Power Platform, Copilot Studio

Languages: English, French, Russian, Italian
